

Model Name:

Switched PDU (no ENV)

Switched PDU provides remote manual control of the critical devices by clicking on a few buttons on the smart phone or computer webpage. Stop the problem device by cutting off the power to a specific outlet. By cycling the power off and restarting the device remotely, you save time and money by eliminating the need to send technicians to the root cause of the problem.

Managers can monitor the total power usage information of PDU from the remote end through the Internet to fully understand the power consumption of all the devices. Set up overload event alerts and notify managers via Email and TRAP, allowing managers to respond to crises in the shortest possible time to minimize disasters.

Provide central management software, which can manage a large number of PDUs' power. The database stores the power consumption information of the power strip and provides the history curve chart for the manager's reference.

Features:

System Function:

- Built-in embedded system:
Support 10M Ethernet interface, provides webpage and SNMP remote management.
- Multiple protocols:
Support ICMP, ARP, IP, TCP, UDP, DHCP, HTTP, NTP, SNMP v1.
- Local display information:
Seven-segments can display current and IP address.

Power Management:

REMOTE MONITOR

Remote Monitor

Remote monitoring PDU status by web and SNMP

REMOTE CONTROL

Remote Control

Remote per outlet on/off by web and SNMP.

CURRENT MEASUREMENT

Current Measurement

Measure PDU total current consumption.

MAIL NOTIFICATION

Mail Notification

Notify specified user by mail and SNMP when outlet action or current over threshold.

THRESHOLD SENSING

Threshold Sensing

User-definable warning and overload threshold value as the basis for alarm.

EVENT ALERT

Event Alert

When current exceeds the preset threshold, PDU will beep and LED will flash.

POWER SEQUENCE

Power Sequence

User-definable power on/off sequence time.

OVERLOAD PROTECTION

Overload Protection

When overload, circuit breaker will automatically trip to protect the safety of electricity.

Central Management

Free centralized monitoring software, real-time monitoring of a large number of PDU, provide data records and history chart.
