

Model Name:

Elite Monitored PDU **Adv.**

Elite Monitored PDU provides user to monitor the total power usage information of PDU from the remote end through the Internet to fully understand the power consumption of all the devices. Set up overload event alerts and notify managers via Email and TRAP, allowing managers to respond to crises in the shortest possible time to minimize disasters.

The PDU has environmental sensor ports that track climate information: temperature and humidity environment variables. The data is available from any web browser and is SNMP-compliant for easy tracking of critical data without the use of any external software.

Provide central management software, which can manage a large number of PDUs' power, temperature and humidity information. The database stores the power consumption information of the power strip and provides the history curve chart for the manager's reference.

It provides an advanced function which is to manage up to 8 PDUs by a single IP address. It means administrators can monitor and control multiple PDUs through one web interface.

Features:

Power Management:

REMOTE MONITOR

Remote Monitor

Remote monitoring PDU status by web and SNMP

KWH MEASUREMENT

kWh Measurement

Voltage, frequency, power factor, active power, apparent power and kWh measurement.

CURRENT MEASUREMENT

Current Measurement

Measure PDU total current consumption.

MAIL NOTIFICATION

Mail Notification

Notify specified user by mail and SNMP when outlet action or current over threshold.

THRESHOLD SENSING

Threshold Sensing

User-definable warning and overload threshold value as the basis for alarm.

EVENT ALERT

Event Alert

When current exceeds the preset threshold, PDU will beep and LED will flash.

OVERLOAD PROTECTION

Overload Protection

When overload, circuit breaker will automatically trip to protect the safety of electricity.

CENTRAL MANAGEMENT

Central Management

Free centralized monitoring software, real-time monitoring of a large number of PDU, provide data records and history chart.

ENVIRONMENT DETECTION

Environment Detection

Optional accessory probe to detect temperature and humidity.

Breaker Detection
